

ACS POWER, VOICE AND DATA SYSTEMS FOR FLOOR AND CEILING APPLICATIONS

TELECOMMUNICATION SYSTEM

This system distributes voice and data throughout the zone. A telecommunication home run cable runs from the telecom closet to a Zone Distribution Box (ZDB). Extender Cables then bring service from the ZDB to individual users.

Consolidation Point (CP) and Multi-User Telecommunication Outlet (MUTO) configurations are available.

STANDARD TELECOMMUNICATIONS SYSTEMS INCLUDE:

- 24 port ZDB coupled with 12 x 4 pair UTP and 12 x 1 pair fiber
- 18 port ZDB coupled with 18 x 4 pair UTP
- 18 port ZDB coupled with 12 x 4 pair UTP and 6 fiber
- 12 port ZDB coupled with 12 x 4 pair UTP
- 12 port ZDB coupled with 2 x 25 pair UTP
- 12 port ZDB coupled with 12 fiber
